The One Master Stroke  
...with Lasting Effect

# AZISYN 250 500

Azithromycin Tablets 250 mg & 500 mg

## Indications

Upper and lower respiratory  
tract infections

Skin and soft tissues infections

Urogenital infections

Highly effective against intracellular pathogens such as  
microplasma, chlamydia, legionella & salmonella

5 day course of Azithromycin is an effective treatment for  
uncomplicated typhoid fever in children & adolescents

Short course of Azithromycin is as efficacious as Clarithromycin

- **It has an increased activity against gram-negative and atypical micro-organisms**

- **Greater acid-stability and its gastrointestinal Tolerance better than erythromycin**

**The Safe and Trusted Antibiotic with unmatched Characteristics**

THE PERFECT BALANCE OF  
SAFETY & EFFICACY

SNC

# SYNOCEF

## 100 DT, 200 & 400

CEFIXIME DISPERSIBLE TABLETS 100mg &  
CEFIXIME TABLETS 200mg & 400 mg

### INDICATIONS:

- RESPIRATORY TRACT INFECTIONS
- URINARY TRACT INFECTIONS
- BONE & JOINT INFECTION
- ENT INFECTION
- UNCOMPLICATED GONARRHOEA
- SKIN & SOFT TISSUE INFECTIONS

- Wide spectrum coverage against bacterial pathogens
- Acts by inhibition of bacterial cell wall synthesis
- Excellent penetration in respiratory tissue & bile
- Highly stable in the presence of beta-lactamase enzymes

The All Generation Antibiotic

Hit hard at opposing **INFECTIONS**

**SYNOCEF**

Cefixime for oral suspension 100mg/5ml

**SYNOCEF-DS**

Cefixime for oral suspension 200mg/5ml

**Dry Syrups**

*Protects Childhood Against Harsh Infections*

*Highly active against both Gram positive and Gram negative organisms*

*Stable in the presence of beta-lactamase*

*Prescribe in :*

Excellent efficacy in Otitis Media

Drug of choice for treating multi dose resistant typhoid

Excellent tissue & Fluid penetration

Perfect move against pathogens

**INDICATIONS**

- Respiratory tract infections
- Pharyngitis, Tonsilitis and Influezae
- Acute Bronchitis
- Community Acquired Pneumonia
- Multidrug resistant typhoid
- Urinary Tract Infections

**The Hard Hitting Antibacterial**

SOS

**Tough Combination for**

**SUCCESS**

**for Tough Pathogens**

# SYNOCEF-AZ 250/500

Cefixime 200mg + Azithromycin 250mg/500mg Tablets

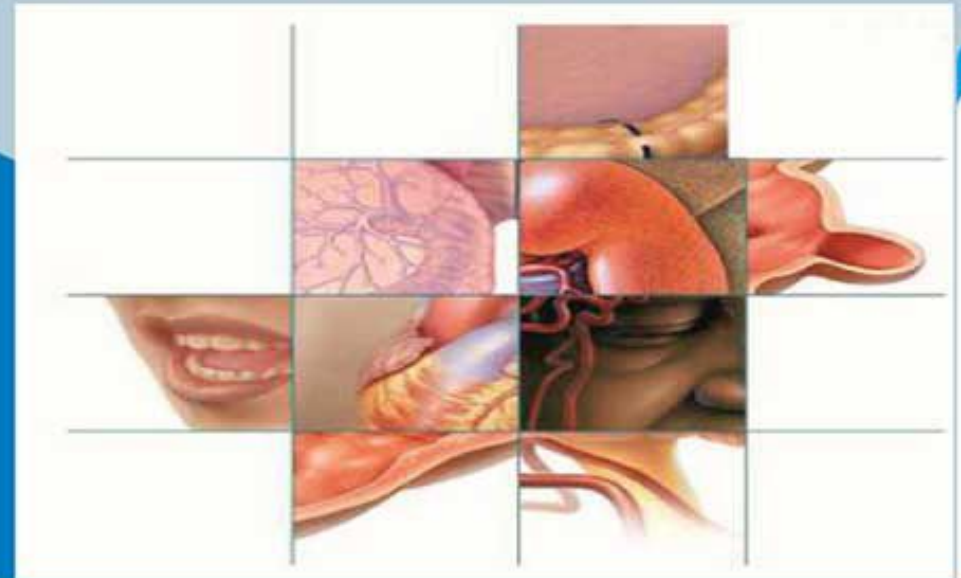

## Cefixime

Higher B-lactamase stability than other Cephalosporin  
Excellent penetration in tissues and body fluids  
Inhibits bacterial cell wall synthesis

## Azithromycin

Superior activity against gram +ve & gram -ve bacteria  
Gastrointestinal tolerance is better than that of Erythromycin, Very long half life

- Potent combination of broad spectrum third generation cephalosporin & Macrolide antibiotic
- Excellent penetration in body tissues & macrophages

SAZ

- Respiratory tract infections
- Urinary tract infections
- Skin and soft tissue infections
- Sexually transmitted diseases
- Gynaecological infections
- Bone & joint infections
- Chronic bronchitis
- Pneumonia
- Typhoid
- Acute Otitis media
- Sinusitis
- Urogenital Infections

**KNOCK OUT infections with perfection**

Knock out **INFECTIONS** With

**SYNOPOD**  $\frac{50}{100}$   
Cefpodoxime Proxetil 50mg & 100mg Per 5ml Dry Syrup 30ml

**SYNOPOD**  $\frac{100DT}{200}$   
Cefpodoxime Proxetil 100mg Dispersible Tablets  
Cefpodoxime Proxetil 200mg Tablets

*Highly active against both Gram positive and Gram negative organisms*

*Stable to beta-Lactamase degradation*

**Pharyngitis/Tonsillitis**

**Urinary Tract Infections**

**Skin & Soft Tissue Infections**

**Community Acquired Pneumonia**

**Chronic Bronchitis**

**1<sup>st</sup> Choice**

**Empirical Therapy**

- Clinical cure rate : 90.3% in Pharyngotonsillitis<sup>1</sup>
- Drug of choice in treatment of most URTIs<sup>1</sup>
- Ideal switch over therapy from intravenous Ceftiaxone in serious RTIs<sup>2</sup>
- Proven efficacy in acute Otitis Media, Tonsillitis and Pharyngitis<sup>2</sup>

**The Hard Hitting Antibacterial**

SNP

# Clinical Challenges... IN THE MANAGEMENT OF INFECTIONS

## **Synoxet** $\frac{250}{500}$

Cefuroxime Axetil Tablets 250mg & 500mg

Orally effective 2nd generation cephalosporin

Short course cefuroxime is superior to the standard oral penicillin regimen in the therapy of pharyngitis

Cefuroxime given 10 days or 4 to 5 days over 10 days of penicillin show better effects

Achieves superior cure rates compared to Amoxicillin/Clavulanic Acid in community acquired pneumonia

First choice option in the treatment of Acute pyelonephritis during pregnancy due to its tolerance microbiological activity and efficacy

### INDICATIONS

LRIT

UTI

SSTI

Gonorrhea

Septicemia

Meningitis

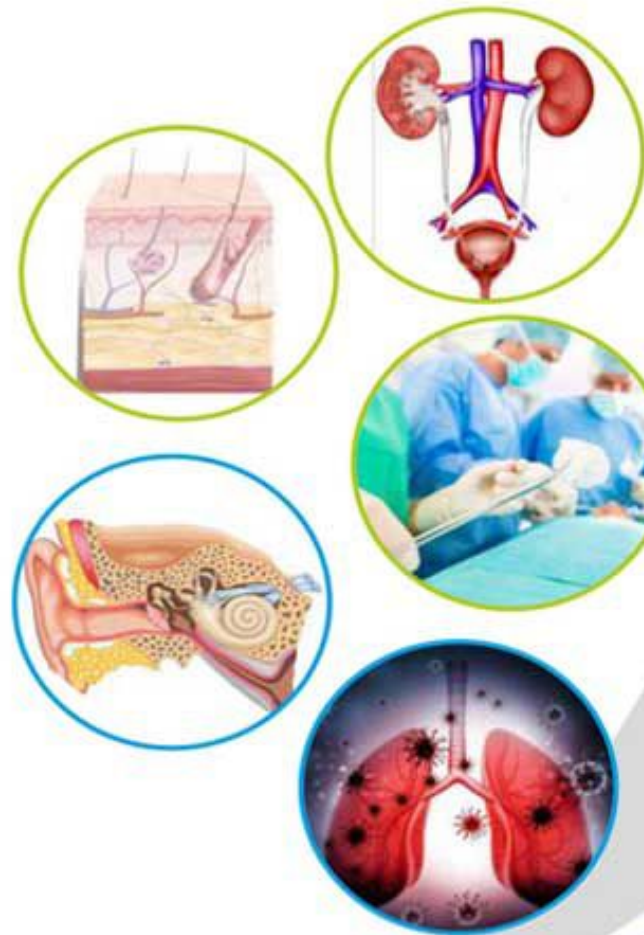

Skin & soft tissue infections

Bone & Joint Infections

ENT Infections

Surgical prophylaxis

**Synoxet** Reliable Therapy **for Assertive Result**

# The Broad Spectrum & Synergistic Bacteriocidal Antibiotic

## SYNOMOX-CL 625 & 1000

Amoxicillin 500 mg & Potassium Clavulanate 125 mg Tablets

Amoxicillin 875 mg & Potassium Clavulanate 125 mg Tablets

### AMOXYCILLIN

- Effective against both gram positive & gram negative organisms
- Achieves peak serum levels (Between 1 to 2 Hrs)
- The safe & well tolerated antibiotic

### POTASSIUM CLAVULANATE

- Inactivates & irreversibly Inhibits variety of beta-lactamases
- Synergises spectrum of Amoxicillin
- Protects Amoxicillin from hydrolysis

Clinically proven Efficacy  
Absorption unaffected by food  
Enhanced Spectrum of Amoxicillin  
Better Patient Compliance

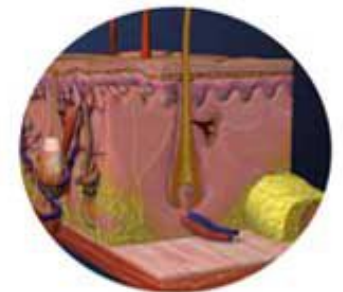

### INDICATIONS :

URTI & LRTI

UTI

GONORRHOEA

SKIN & SOFT TISSUE

**A Combination That Assures Safety Against Infections**

# OVERCOME TOUGH **INFECTION** RESURANCE

## LEVOSYN 500 & 750

Levofloxacin Tablets 500 mg & 750 mg

- Active against Gram +ve & Gram -ve, atypical & anaerobes
- Broad spectram antibacterial agent.

Levofloxacin is similar to ofloxacin in all respects that it is twice as potent.

Among all fluoroquinolones, Levofloxacin shows greates activity against the mycobacterium tuberculosis.

Respiratory Tract Infection

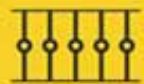

Skin & Soft tissue Infection

Urinary Tract Infection

Urinary Tract Infection

Community Acquired Pnemonia

Chronic Bronchitis

SYNERGISTIC ACTION FOR BEST RESULTS

**For deep seated bacterial infections, The Right Quinolone**

# **MOXISYN 400**

Moxifloxacin Tablets 400 mg

**Excellent Coverage**

**Complete eradication**

**Greater Safety**

**unmatched Compliance**

- Broad spectrum of activity against common pathogens
- Prevents development of drug resistant pathogens

### **Safe & Sure Therapeutic Results in**

- Community-acquired pneumonia
- Chronic bronchitis
- Acute bacterial sinusitis
- Acute pyelonephritis
- Urogenital infections
- Bone & joint infections

*Double Strength for Stubborn Infections...*

MXS

**Guard the body against**

**Gastro Intestinal Infections ...**

**Rifaxyn 200  
550**

Rifaximin Tablets 200mg & 550mg

**Non-invasive bacterial diarrhoea doesn't need an antiprotozoal**

## Rifaxyn offers

Wide-spectrum, long-acting, GI-Specific antibiotic and has no clinically relevant bacterial resistance.

Useful in the treatment of GI disorders associated with altered bacterial flora, including IBS and small intestinal bacterial over growth.

Improves symptoms associated with IBS, such as bloating, flatulence, stool consistency and abdominal pain.

## Indications

Irritable Bowel Syndrome (IBS) with Diarrhea

For the treatment of Hepatic Encephalopathy

Non-invasive bacterial diarrhoea

Uncomplicated diverticular disease

Prophylaxis of colorectal surgeries

**Drug of choice in the treatment of Acute,  
Non-complicated infectious diarrhoea**

# FRONT LINE LEADERS IN PAIN & INFLAMMATION

## SYCLONAC-SP

Aceclofenac 100mg + Paracetamol 500mg +  
Serratiopeptidase 15mg Tablets

### ACECLOFENAC

Aceclofenac was significantly more effective than diclofenac in improving knee flexion after 2-4 weeks of treatment  
Better safety than conventional NSAIDs with respect to adverse effects on gastrointestinal & cardiovascular system  
Patients with symptomatic OA of the Knee showed a greater improvement in pain & functional capacity with aceclofenac than paracetamol.

### PARACETAMOL

The versatile analgesic & time tested, safe & effective pain reliever.

### SERRATIOPEPTIDASE

Powerful treatment for pain and inflammation with  
Specially inducing fibronolytic, anti-inflammatory activity &  
anti-edemic activity.

Block pain inducing amine from inflammation site

Arthritis

Sprain & Strain

Fractures

Sports Injuries

Post-operative Wounds

Dental pain & Surgery

**Restores Smiles, Relieves Pain...**

**Trio Power Against Pain...**

The triple strength to control Pain, Spasm & Inflammation

# Synzox-MR

Aceclofenac 100mg & Paracetamol 325mg &  
Chlorzoxazone 250mg Tablets

**Aceclofenac** Relives pain & infammation.

**Paracetamol** is used with NSAIDS in the management of more severe pain.

**Chlorzoxazone** is a centrally acting muscle relaxant used to treat muscle spasm and the resulting pain or discomfort.

Aceclofenac and Paracetamol have good analgesic & anti-inflammatory actions while Chlorzoxazone is good skeletal muscle relaxant.

## Indications

Rheumatoid Arthritis

Back Pain

musculoskeletal Disorders

Soft Tissue Injuries

Tendonitis & Bursitis

Post Surgical Pain

Experience the superior relief

**An effective & Safe treatment option for  
inflammatory arthritis, Including rheumatoid arthritis ...**

# Leflusyn

Leflunomide Tablets 20mg

**New development for arthritis**

## Indicated for

- ▶ Leflunomide is used to treat adult patients with active rheumatoid arthritis.
- ▶ Symptoms of rheumatoid arthritis include inflammation of joints, swelling, difficulty moving and pain.
- ▶ Other symptoms that affect the entire body include loss of appetite, fever, loss of energy and anaemia (reduction of red blood cells).

- ▶ New oral DMARD for RA treatment
- ▶ Isoxazole Derivative
- ▶ Pyrimidine synthesis inhibitor
- ▶ Active metabolite undergoes enterohepatic circulation
- ▶ Has both anti inflammatory and immuno modulatory properties
- ▶ Act by inhibiting the synthesis of DNA & RNA in immuno response cell particularly T-Cell
- ▶ Also inhibits the production of cytokines
- ▶ Rapid onset of action

*Improves both functional ability & physician based efficacy measures in patients with RA  
Has demonstrated efficacy as a monotherapy in psoriatic arthritis & also has a beneficial effect in psoriasis.*

*Retention on treatment with Leflunomide is equal to Methotrexate & superior to other DMARDs  
Holds considerable promise as an anti-rejection drug for use in recipients of corneal transplants in whom Cyclosporin-A and steroids are contraindicated*

LFS

***Disease Modifying Anti-Rheumatic Drug\* (DMARD)***

Pain free  
**MOBILITY**  
is a reality  
now..

Celecoxib Capsules  
100 mg & 200 mg

**SYNCOX<sup>100</sup><sub>200</sub>**

*Restores easy mobility by resolving  
pain & Inflammation*

- ▲ Rheumatic & arthritic condition
- ▲ Traumatic pain & inflammation
- ▲ Painful shoulder
- ▲ Low back pain
- ▲ Pelvic inflammatory diseases
- ▲ Dental pain
- ▲ Post surgical pain & inflammation

COVENIENT ONCE TWICE DAILY DOSE FOR BETTER COMPLIANCE

RELATIVELY FREE FROM GASTRO-INTESTINAL SIDE EFFECTS

**SYNCOX**

*The better choice in pain & Inflammation*

Celecoxib Capsules 100mg & 200 mg

# Restores the Flexibility and add strongness in bones & Joints

# Ortho-Flex

Glucosamine Sulfate 500mg, Chondroitin Sulfate 100mg, Hyaluronic Acid 1.66mg,  
Methylsulfonylmethane 375mg & Vitamin D3 1000IU Tablets

- ★ Improves Joint comfort & Stiffness
- ★ Soothes achy joints
- ★ Promotes mobility & flexibility
- ★ Helps to relieve Joint pain associated with Osteoarthritis
- ★ Helps to prevent cartilage degeneration and treat Arthritis
- ★ Protects and defends against the signs of aging and joint wear & tear

## INDICATIONS:

- Maintenance of normal connective tissues
- Beneficial to cartilage
- Strengthens the bones
- Improves joint function and mobility
- Helps reduce pain and stiffness

Glucosamine Sulfate and MSM act as the building blocks for proteoglycans and stimulate chondrocytes to make new collagen and proteoglycans.

Glucosamine Sulfate and MSM when taken together are shown to have double the joint comfort relief than either alone

## GLUCOSAMINE:

Halts Joint Degradation and relieves Pain

## CHONDROITIN:

Reduces pain and inflammation, improves joint function and slows progression of osteoarthritis (OA)

## HA:

hyaluronic acid delivers the building blocks necessary to formulate the of proteoglycans that comprise healthy joints

## MSM:

Helps in Structural integrity of cartilage by promoting collagen synthesis and inhibits pain impulses and provides pain relief

## VITAMIN D3

Builds and maintains strong bones;

Aids with calcium absorption; helps prevent osteoporosis;

and helps regulate cells responsible for autoimmune functions.

## ESSENTIAL TO SUPPORT BETTER JOINT HEALTH

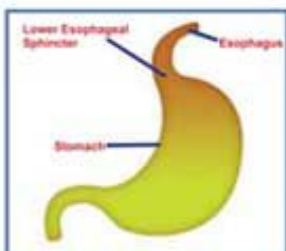

**Fight Heartburn associated with GERD with the power of**

# **D-LANOSYN-30 & 60**

**Dexlansoprazole Modified Release Capsules 30mg & 60mg**

**The only PPI with dual release Technology**

**Dexlansoprazole is effective for the symptomatic relief in Non-erosive Gastro-esophageal Reflux Disease Patients.**

Dexlansoprazole is an enantiomer of Lansoprazole

Use in the treatment and maintenance of patients with erosive oesophagitis and non-erosive gastroesophageal reflux disease (GERD or GORD)

Take D-LANOSYN any time of day, with or without food

D-LANOSYN provides up to 24 hours of relief from heartburn due to GERD

## **INDICATED FOR :**

- Healing of all grades of Erosive Esophagitis (EE)
- Maintaining healing of EE and relief of heartburn
- Treating Heartburn associated with symptomatic non-erosive gastroesophageal reflux disease (GERD)

**THE ONLY PRESCRIPTION TREATMENT WITH TWO RELEASES OF GERD MEDICINE WORKING TOGETHER IN ONE PILL**

# **Extended Symptom Control**

**When Acid Strikes...**

**....Every minute seems like endless**

# ESOMYN 20/40

Esomeprazole Delayed Release Tablets 20mg & 40mg

**1 TABLET**  
A DAY

**24 HOUR**  
PROTECTION

**FREQUENT**  
HEARTBURN RELIEF

## Indications :

Peptic Diseases

Heartburn

Reflux Esophagitis

Chronic Dyspepsia

GERD

NSAID Induced Gastric Ulcers

## Controls heartburn within a minute

- Attains  $\text{PH} > 6$  within 60 seconds for immediate control of Heartburn
- Maintains  $\text{PH} > 4$  for 22.5 hrs-Total 24 hours protection\*

**A Recommended First Line Treatment  
For Frequent Heartburn....**

Acid in stomach can change every moment .....  
..... in to a painful never ending moment

R<sub>x</sub> Immediate acting PPI

# ESOMYN-LSR

Esomeprazole 40mg + Levosulpiride 75mg Tablets

## Esomeprazole

- Early response in erosive esophagitis compared to Omeprazole
- Early response in chronic heart burn
- Significantly greater control of moderate to severe GERD comparison to Pantoprazole
- Well tolerated

## Levosulpiride

- Selective antagonist of dopamine D2 receptors activity both central & peripheral levels
- Mood elevating properties & relieves GERD

**Fast Action**  
**Faster Relief**

## Indicated in :

- GERD, Dyspepsia, Peptic Ulcer, Anxiety
- Irritable Bowel Syndrome, Heart Burn
- Zolinger Elision Syndrome
- Healing of Erosive Esophagitis

EML

**Protection beyond symptoms relief .....**

# The Right Therapy for Functional Dyspepsia & Gastroparesis

## RABESYN LSR

Rabeprazole Sodium 20mg ER & Levosulpiride 75mg SR Capsules

• **Rabeprazole** - The fastest acting PPI provides fast onset of action thus fast relief from symptoms.

Protect PPI provides 99% inhibition of proton pump thus maximum suppression of acid release is achieved

• **Levosulpiride** - the new prokinetic agent, demonstrates greater central antidopaminergic activity, antiemetic and antidyspeptic effects.

Provides better relief from overall symptoms thus ensures better quality of life to patients.

Well tolerated by patients with high safety profile.

**Levosulpiride**-the new prokinetic agent. Demonstrates, greater central anti dopaminergic, antiemetic and antidyspeptic effects.

Reliable Combination with Rabeprazole which starts working immediately and keeps controlling acid reflex 24 hours

Well tolerated by patients as compared to Domperidone with high safety profile

### Most Effective with More Comfort

GERD

Dyspepsia

Diabetic Gastroparesis

## Better Relief from Symptoms, Better Quality of Life

**When severe ACIDITY  
Needs urgent control**

# Pantosyn-DSR

Pantoprazole 40 mg + Domperidone 30 mg SR Caps

IN IDEAL COMBINATION

**Controls Acid Secretion & Reflux Oesophagitis**

## Pantoprazole

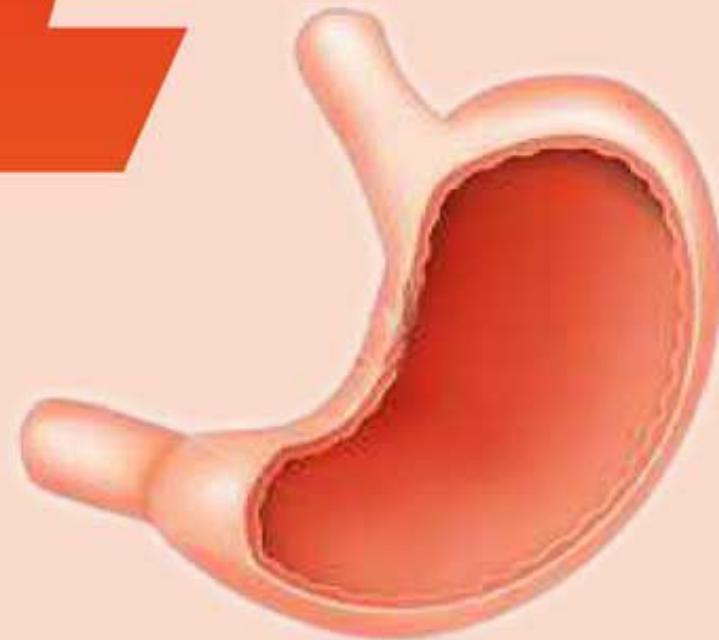

- ◆ Offers longer duration of acid inhibition
- ◆ Prevents both daytime & night time heart burn

## Domperidone

- ◆ Offers pro-kinetic and anti-emetic effects
- ◆ Accelerates Gastric emptying time

## Effectively heals :

- Heat Burn
- Dyspepsia
- GERD
- Gastric Ulcer
- Reflux Esophagitis

***The best Champion against acid pain***

# The Preferred Anti-bacterial For Complex & Tough Infections

# **SYFAXON** **1g**

## Ceftriaxone for Injection 1gm Vial

### Indications :

- ✓ Deep Tissue Infection
- ✓ Surgical Prophylaxis
- ✓ Respiratory Tract Infections
- ✓ Sexually Transmitted Disease
- ✓ Skin & Soft Tissue Infections
- ✓ Urinary Tract Infections
- ✓ Pneumonia
- ✓ Bacterial meningitis
- ✓ Typhoid
- ✓ Gynaecological Infections
- ✓ Septicaemia
- ✓ Bone & Joint Infections

Prolonged Concentrations in the tissues beyond  
24 hours broad spectrum coverage

Covers the most common pathogens with low MIC values

Antibacterial activity starts immediately

SFX

*Offers Better Coverage With Total Confidence*

*Presenting*

# An Extra Ordinary Combination of .... 3rd Generation Cephalosporin + Betalactamase Inhibitor

# SYFOZON-S

## 750mg & 1.5g

Cefoperazone 0.5/1g + Sulbactam 0.25/0.5g Vial

### Indications :

- ✓ Nosocomial Infections & surgical prophylaxis
- ✓ Respiratory Tract Infections
- ✓ Sexually Transmitted Disease
- ✓ Skin & Soft Tissue Infections
- ✓ Urinary Tract Infections
- ✓ Chronic suppurative bacterial otitis media
- ✓ Bacterial meningitis
- ✓ Cholecystitis
- ✓ Osteomyelitis
- ✓ Bone & Joint Infections

### Ceftriaxone :

Active against aerobic gram +ve & -ve micro-organism & many anaerobic micro-organism  
Achieves excellent tissue and fluid penetration  
Maintains longer half life among all cephalosporins allowing for once daily dosing

### Sulbactam :

Inactivates enzymes that destroys penicillins & Cephalosporins by lactamase resistant structure  
Exhibits bactericidal activity against: Staphylococci, H.Influenzae, M.Catarrhalis & Neisseria spp.  
Potentiates activity of lactamase sensitive Ceftriaxone & Increases its spectrum

***The Dependable Duo Against Resistant Infections***

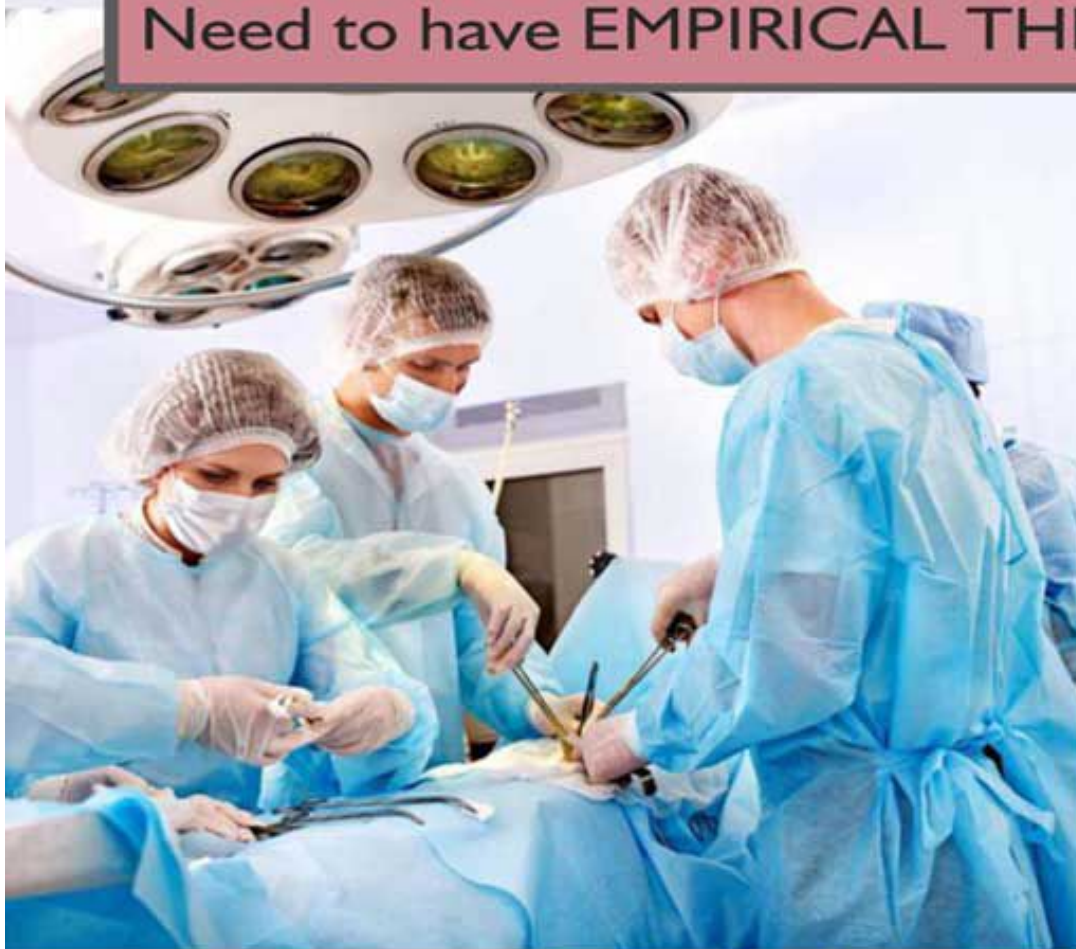

In serious INFECTIONS

# PIPERSYN-T

Piperacillin 4.0gm + Tazobactam 500mg

Need to have EMPIRICAL THERAPY

- ◆ Piperacillin / Tazobactam is useful for the treatment of infections that are likely to be polymicrobial or in situations where organisms with plasmid-mediated B-lactamases have become problematic.

## Piperacillin

- Broadest spectrum of activity that includes *P. aeruginosa*
- Increased potency against enterobacteriaceae and *P. aeruginosa* compared to Ticarcillin - Clavulanate
- 84.4% cure rate in complicated SSTI with diabetes

## Tazobactam

- Prevent destruction of penicillin by B-lactamase and thus synergizes the activity of penicillin

**Bacteremia & Septicemia**

**Post Surgical Infection**

**Pneumonia & Bronchitis**

**Urinary Tract Infection**

**Skin & Soft Tissue Infection**

**Meningitis**

**Promotes fast recovery from Infections**

For better and faster relief in gripping kind of pain

# SYCLONAC

150mg/1ml Injection

Aceclofenac Injection 150mg/ml Solution for IM Injection

Has enhanced tolerability and decreased common side effects as compared to Diclofenac

One of the most popular analgesic and anti-inflammatory drugs used for the relief of pain, rheumatoid arthritis, and osteoarthritis

Was better tolerated in terms of incidence and severity of GI adverse events and gastro protective agent requirement and was as efficacious as Diclofenac

Has been shown to have potent analgesic and anti-inflammatory activities similar to Indomethacin and Diclofenac

LOWER BACKACHE

FOOT PAIN

MUSCLE CRAMP

STIFF NECK

ARTHRITIS

HEADACHE

**SYCLONAC** supports you,  
whenever you need in

- ★ Orthopedic emergencies
- ★ Osteoarthritis
- ★ Post-operative Pain
- ★ Fractures
- ★ Trauma
- ★ Rheumatoid Arthritis

**Dosage**  
1 Injection every 6-8 hrs or  
Once or twice daily for 5 days  
or as prescribed by the physician

## **ACECLOFENAC**

Better control over the pain than Diclofenac  
Faster onset of action  
Safe  
Tolerable

Unbounds from the shackles pain

# Balanced antacid preparation for effective management of Hyperacidity

## SYNOCID *Mint Flavour*

Dried Aluminum Hydroxide gel eq. to Aluminum Hydroxide 200mg, Magnesium Hydroxide 200mg, Activated Dimethicone 25mg Suspension 200ml)

For better consistent relief & healing in severe reflux oesophagitis therapy

### Useful in

- Heart Burn
- Epigastric Pain
- Flatulence
- Indigestion
- Dyspepsia
- Gastritis
- Hyper Acidity
- Abdominal Discomfort
- Gaseous Detention

### The superior acid neutralizer

Absolutely safe for long term use  
The safest non-systemic antacid and anti-flatulent combination  
Maximum acid neutralising capacity  
Relief typically occurs instantly  
Provides prompt relief

### Offers Antacid and Anti-Flatulent Remedy

#### Aluminum Hydroxide:

Neutralizes and reduces stomach acid relieving heart burn and indigestion

#### Magnesium Hydroxide:

Neutralizes stomach acid by reducing the pH of the stomach and increases intestinal movement

#### Activated Dimethicone:

Neutralizes and reduces stomach acid relieving heart burn and indigestion

#### Aluminum:

Provides some extra protection (from gastric acid) to cells lining the stomach

#### Magnesium:

Helps prevent constipation, which may be caused by the aluminum

#### Activated Dimethicone:

Possesses anti foaming and anti bloating effects significantly reduces nausea, vomiting, discomfort in stomach and abdominal pain. Safe and effective in relief of gas associated with heart burn.

## An effective way to treat acidity
